

CLIENT TESTIMONIALS/RECOMMENDATIONS

Truist

Jodie Zdrok - Sr. Digital Product Manager

"Once you've worked with Leigh, you remember him -for all the right reasons. He exhibits results-focused leadership and dedication to the client experience. "Collaboration" isn't just a buzzword that applies; it's his superpower. He works with and across teams from product, technology, vendor, and support in a highly complex environment with confidence, clarity, and effectiveness. who gets it done and makes demanding work look effortless. He brings people together and articulates the goals so all are aligned.

He thrives on pulling together the who and what is needed to achieve project outcomes. It has been very rewarding to work alongside him. Any project team that works with him is likely to win with him on it."

Lee Lively-Garcia - Transitions Management Team Group Leader

"We have worked on several projects together over the past few years at Truist. I have seen firsthand what he has been able to accomplish as a program manager and most recently, as product manager for a product that is being retired. He engenders cooperation from all his stakeholders and participants by being so engaging with everyone. He is consistent in his delivery and his platform migration projects are on time –each and every time."

Jennifer Fessia - Wholesale Digital Product Owner

"From our first meeting during the merger, I knew that this guy's meetings were not to be missed! He brought people together and actually had them talking with each other –not AT each other. Everyone was engaged. We were coming up with solutions! Fast forward to 2023 and we were teammates in a newly formed Wholesale Digital space working together as we migrated and sunset an application. Again, I've seen him work his "magic" across departments to facilitate the migration of our 6,000 clients to a new platform. He is an amazing teammate, project partner, and project manager."

Sheri Pepper - Business Project Manager

"Leigh is a wonderful project leader to partner with –his organization, attention to detail, and his drive to "get things done" are amazing to see. His enthusiasm and wit kept us all motivated and engaged!"

Feedzai

Ward Howell - Vice President – Network Channel Sales

As Feedzai's Vice President for Network Channel Sales, I saw first-hand what Leigh was able to accomplish for our Atlanta office; he oversaw multiple, complex projects; he managed our vendor relationships for our corporate housing, transportation, and office sites; and he was a great mentor to our on-site staff. If anyone had a problem or a question, they knew Leigh was the go-to guy for answers. Leigh is the guy who gets things done.

Gagnon Sekhon - Sr. Product Manager

Leigh is an exceptional project manager. He was responsible for a client-side implementation while I was at Feedzai. He made sure the team working on the project was doing well and not just focused on writing code given most were away from home. He also worked diligently to advocate for client needs and goals to the platform team. His requirement gathering helped us build the best possible product for multiple different clients with single feature releases.

Deepti Sharma - Program Manager/PMO

Leigh consistently demonstrated exceptional leadership skills and managed complex and multiple projects, successfully meeting our clients' demands. His outstanding communication skills allowed him to listen to and meet clients' expectations, fostering healthy relationships that resulted in repeat business. He was also an excellent mentor to our team of junior consultants who looked up to him when they needed advice or direction. I highly recommend Leigh to any organization; he will undoubtedly be an invaluable asset to any team.

LabLynx

John Jones - President/CEO - LabLynx

"I really liked the work he did for me. He has a great attitude and amazing organizational skills. He is a real winner and just great to work with."

Identity Sciences

Christina Yeager - Program Realization Manager

"In my role as the Program Realization Manager at Identity Sciences, it is my responsibility to make sure that all three pieces --the LIMS, the science, and the technology --come together and work together seamlessly. With Leigh on my team, he helps make that possible. Under Leigh's guidance, he has married "form" AND "function" to our LIMS product. From Day 1, he had a vision for how the system should work for the user; how the system should look; how it should feel --and he made that a reality. Our customers have been wowed! He is the ultimate team player: He works closely with our R&D science team, our IT staff, our vendors, our customers, and me to ensure that we are successful. When it comes to Leigh, he gets the job done --and done right. I'm glad I have him on my team."

Georgia Department of Natural Resources

Stephen Bigotto - IBM Architect – Georgia Dept. of Natural Resources

"Leigh fosters an excellent, open working relationship. He is well-prepared, knowledgeable, and facilitates effective give-and-take discussions."

David M. Jones - Laboratory Program Director - Georgia Dept. of Natural Resources

"Leigh is the first person I have ever met at the Department of Natural Resource who actually spoke "lab". It was so very refreshing! He took the time to listen to our concerns, he asked questions, shared some possible solutions we could consider --and the best part was his follow-up: He delivered what he said he would!"

GXS/OpenText

Mike Caruso - Senior Account Executive - GXS

"Thanks to Leigh's leadership, his team's outstanding performance achieved ALL of our migration targets, which now earned us the full remaining \$75K in bonuses this month for revenue in September --bringing our total to \$500K for the year! His team had a yeoman's task in exceeding the contracted targets given several factors that made these goals a stretch. However, his commitment of working closely with the Wells Fargo management team made this happen and secured our strategic relationship with that client."

Sanofi

Eric Hoffman - Senior Consultant, LabAnswer

"I worked with Leigh on the LIMS implementation project for Sanofi. He has a unique gift for taking very complex concepts and processes and then being able to break them down in such a way that it helps everyone see the problem which then helps everyone work towards a solution. I would welcome the opportunity to work with him any time!"

Centers for Disease Control & Prevention

Evan Sowers, Sr. Microbiologist - Foodborne Disease Branch

"Leigh is definitely a detail-oriented technology consultant who worked with my team at the CDC to deploy STARLIMS for our branch. He was always clear and concise in his communications and came up with innovative ways to have the system work for us. (When branch leadership heard about what he had accomplished for us, he quickly became a hot commodity across the NCID. Everyone wanted Leigh to oversee their implementations!) He's good. We loved him!"

Patricia Lynn Shewmaker, PhD. - Streptococcus Laboratory

"Leigh was truly committed to the success of my laboratory. We are (admittedly) not the easiest group to work with on such a huge project –but he persevered! He took the time to understand our needs and our pain points and provided us with solutions that could truly help us work smarter, not harder. If you want an implementation to go right, get Leigh!"
